Item #6-10528, Hougen Pilot " 12,000-Series" **\$23.50**

Thank you for shopping with us!

For use with Hougen® Portable Magnetic Drills and many competitive models on materials up to o275 BHN (28.5 HRC). They are made of hardened M2 high speed steel and are precision ground for excellent performance throughout the cut and long tool life. They require less horsepower and thrust to cut, and last much longer than traditional holemaking methods. Rotabroach® Cutters have a ¾" diameter double-flatted shank. Modified end tooth geometry is also available for drilling in stacked plate applications. Rotabroach® Cutters maximize feed rates because up to 10 cutting edges distribute the cutting load evenly. Rotabroach® Cutters convert a smaller area to chips, requiring less horsepower and thrust. The Hougen-Edge® feature is a patented tooth geometry that provides long tool life, less chatter, and extended resharpenability. The slug also offers a higher scrap value than loose chips.

| SPECIFICATIONS | |
|---------------------------|----------------------------------|
| Cut Depth | 6 in |
| Material Thickness | For Extended Reach 12,000 Series |
| Usage/System | |
| Manufacturer | Hougen |
