Item #6730, Century Tang Shank 4" Length x 0.035" Carbide Grit Jigsaw Blade, 25-Pack

$135.99

Thank you for shopping with us!

• Carbide grit jig-saw blades cut extremely hard abrasive materials such as ceramic tile, cast iron, thin masonry, stone, slate, and marble.
• A cutting edge of tungsten carbide particles is bonded to an alloy steel back.
• High heat and abrasion resistance with no teeth to dull or chip creates greater wear resistance and a longer tool life. These blades never require resharpening.
• Tungsten carbide grit blades offer superior cutting performance in masonry, ceramics, tile, plastic, and steel plate under 1/2″ thick.
