Ultra Bit™ Multi-
Diameter 3-Flats on
Shank.

- Special axial and radial flute design speed workpiece penetration.
- Dual flute construction drills clean accurate holes in thin materials, quickly and easily.
- Use for all thin metals, rigid plastics, wood, or composite materials with a thickness equal to or less than the step thickness.
- 135° split point self centers and easily starts with no pilot hole required.

When drilling steel with 1/8" or greater thickness, a starter hole of the smallest step diameter will speed the drilling process.

Titanium nitride coated tools last six times longer than uncoated tools. Cutting edge stays sharper longer. Titanium nitride coating reduces friction.
