Finish-Bottom:  
Excellent

2 Flute  
routers work  
well with  
harder  
materials,  
providing an  
excellent  
finish to the  
material.

Endmill points  
are most  
often found  
on 3 and 4  
flute routers.  
They are good  
for achieving  
a smooth  
finish on a flat  
bottom  
surface, and  
are commonly  
used in the  
plastic routing  
industry.

Straight flute  
router bits are  
generally  
used for  
routing  
plastics and  
other soft  
materials.  
They're a  
great choice  
for hand feed  
operations.
