Finish-Bottom:
Excellent

2 Flute
routers work
well with
harder
materials,
providing an
excellent
finish to the
material.

Endmill points
are most
often found
on 3 and 4
flute routers.
They are good
for achieving
a smooth
finish on a flat
bottom
surface, and
are commonly
used in the
plastic routing
industry.

Straight flute
router bits are
generally
used for
routing
plastics and
other soft
materials.
They're a
great choice
for hand feed
operations.
