**\$195.94**

Thank you for shopping with us!

Material Finish-Top: Excellent  
Material Finish-Bottom: Poor

Spiral flute router bits should only be used in automatic feed operations. They are good for use on all materials. Downcut routers produce the best finish to the top of the material. Chips flow in a downward direction. Endmill Points are most often found on 3 and 4 flute routers. They are good for achieving a smooth finish on a flat bottom surface, and are commonly used in the plastic routing industry.
