Item #99-028, Freud Variable Corner Round Bit \$88.16

Thank you for shopping with us!

Application: Rounding two edges in one pass

-The Freud variable corner round bit saves you time by rounding both edges on a board in one pass, rather than using standard rounding over bits that require two passes. Works with stock from 7/16" to 1 1/4" thick.

-Cuts all composition materials, plywoods, hardwoods, and softwoods.

-Use on hand-held and table-mounted portable routers.

By simply reconfiguring the shims and bearing you can cut the different thicknesses of stock
