Item #B8SQ, Whiteside Square Bearings \$7.32

Edge of Arlington offers free shipping in the United States when you choose flat rate shipping Here's a Square Deal! A quality Whiteside Trim Bit with the exclusive Euro Square Bearing. How does it work? The square bearing stops spinning as soon as it touches the workpiece. Then the side of the square simply slides along the workpiece edge. Compare this to a regular bearing that rolls along the edge—building up more glue and residue with every revolution. Plus, the square is made from non-stick Teflon® so it wipes clean easily and it won't mark your workpiece. If you cut laminates, you need to try this bit. Used on router bits to follow a template or the flat edge of your workpiece. Inside of bearing has several metal balls that allow the bearing to freely roll without restraint.

Replace the standard 1/2" B3 bearing found on most of our Edge Form bits with the **B3SQ** square bearing if residue build-up on the bearing or marring of the workpiece is a problem.

Recommended for solid surface applications. **B3SQ** is a 1/2" square. **B8SQ** is a 3/4" square. Both are standard 3/16" inside diameter.

SPECIFICATIONS	
Manufacturer	Whiteside Machine
Inside Diameter	3/16 in
Outside Diameter	3/4 in
