Item #BURS-154NF, Amana Tool Ball Shape 3/8" D x 5/16" CH x 1/4" Shank Non-Ferrous ZRN Coated SD Burr Bit for Die-Grinders
$32.93

Thank you for shopping with us!

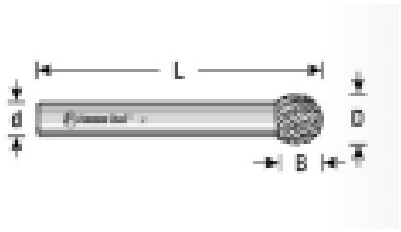

Non Ferrous (NF) burrs are specially designed for cutting all non-ferrous and non-metallic workpieces such as aluminum, zinc, plastic, wood, etc. The uniquely aggressive cutting action provides little to no chance of plugging the flutes.

Applications: To be used with air or electricity-driven hand die-grinder with a typical collet mechanism or knee mill with an air-driven spindle speeder such as an Air Turbine product. An air speeder can bump spindle.

(Carbide brazed to steel shank.)

Warning: Not to be used in conventional routers.

Excellent for cutting:
-Aluminum
-Brass
-Bronze
-Copper
-Zinc
-Plastic
-Wood

Benefits of Zirconium Nitride (ZrN) Coating:
Creates a harder and tougher cutting edge; allows for a prolonged cutting edge life and helps to prevent the build-up of material in the flutes while cutting. Has the tendency to run/spin much faster than an uncoated tool.

SPECIFICATIONS	
Manufacturer	Amana Tool
Diameter	3/8 in
Carbide H, or Cut H/L/W	5/16 in

SPECIFICATIONS	
Note	Warning: Not to be used in conventional routers.
Overall Length	2 1/8 in
Shank	
Style	NF Ref #SD-3FM
Type	Non-Ferrous/ZRN-Coated
