**Item #BURS-170, Amana Tool Solid Carbide Oval Shape 1/8" D x 7/32" CH x 1/8" Shank Double Cut SE Burr Bit for Die-Grinders**  
**\$6.38**

Thank you for shopping with us!

**Double Cut (DC)** burrs utilize a cross flute of exactly half the number of standard flutes in an opposing helix. Benefits include rapid removal of a broad range of materials combined with excellent operator control. It does this by incorporating a cutting rake angle that gives great "bite" into the material, and yet is not so aggressive that the operator fatigues quickly after using it in a hand piece. A DC flute geometry gives better performance in low RPM applications, but still performs well at high RPMs.

**Applications:** To be used with air or electricity-driven hand die-grinder with a typical collet mechanism or knee mill with an air-driven spindle speeder such as an Air Turbine product. An air speeder can bump spindle.

(Carbide brazed to steel shank.)

Warning: Not to be used in conventional routers.

Excellent for cutting:

- Aluminum
