Item #BURS-214NF, Amana Tool Radius Cone Shape 3/8" D x 1 1/16" CH x 1/4" Shank Non-Ferrous ZRN Coated SL Burr Bit for Die-Grinders \$43.24

Thank you for shopping with us! **Non Ferrous (NF)** burrs are specially designed for cutting all non-ferrous and non-metallic workpieces such as aluminum, zinc, plastic, wood, etc. The uniquely aggressive cutting action provides little to no chance of plugging the flutes.

Applications: To be used with air or electricity-driven hand die-grinder with a typical collet mechanism or knee mill with an air-driven spindle speeder such as an Air Turbine product. An air speeder can bump spindle. (Carbide brazed to steel shank.) Warning: Not to be used in conventional routers. Excellent for cutting: -Aluminum -Brass -Bronze -Copper -Zinc -Plastic -Wood *Benefits of Zirconium Nitride (ZrN) Coating: Creates a harder and tougher cutting edge; allows for a prolonged cutting edge life and helps to prevent the buildup of material in the flutes while cutting. Has the tendency to run/spin much faster than an uncoated tool.

SPECIFICATIONS

Cut Height, Length, or Width	1 1/16 in
Manufacturer	Amana Tool
Diameter	3/8 in
Note	Warning: Not to be used in conventional routers.
Overall Length	2 13/16 in
Shank	1/4 in
Style	NF Ref #SL-3FM
Type	Non-Ferrous/ZRN-Coated
