CUTS

Item #DDD060DIA101F, Diablo® Tools Diamond Disc for Grinding & Polishing Metal: 6"

\$22.52

Thank you for shopping with us!

Diamond metal cut-off wheels deliver extreme durability, minimal downtime, and increased productivity. These diamond rimmed wheels deliver 100X longer cutting life versus a standard bonded cut-off disc in some of the most intense metal cutting situations. The wheel's long lasting durability maximizes cutting even in extreme applications such as rebar, angle iron, cast iron, and steel bar. Diablo's diamond metal cut-off wheels not only provide long lasting cutting life, durability, and control. These diamond discs also allow for a safer cutting experience.

Diamond rimmed wheels deliver up to 100X longer cutting life and durability when compared to one standard bonded cut-off disc. Advanced Electro-Plating Process for even distribution of diamond abrasive cutting edge. Maintains cutting diameter for consistent cutting results. Diamond technology is safer to use versus bonded discs by providing more control, fewer sparks, and less dust. Diamond wheels do not shatter or break when dropped.

Ideal For: Grinding & Polishing Metal

SPECIFICATIONS

Manufacturer	Diablo Tools
Application	Rebar, Angle Iron, Cast Iron, Steel Tube
Recommended For	Grinding & Polishing Metal
Arbor	5/8 in, 7/8 in
Hub	1
Rim Design	Segmented
RPM	10,150
Size	6 in
