Item #DMADA1400, Diablo 14" Diamond Segmented Blade for Asphalt \$143.22

Thank you for shopping with us! Diablo's Diamond Segmented Blade offers extreme durability, up to 3X cutting life, and precision in asphalt or concrete applications. Its segmented rim design enhances cooling and debris removal, ensuring faster, cleaner cuts. Constructed with industrial-grade diamonds and a hardened disc body, this blade delivers exceptional longevity and cutting efficiency, even in the most demanding conditions. The undercut protection ensures maximum durability and protection by preventing premature wear of the blade and loss of diamond segments. Whether working on roadwork, construction, or demolition projects, this premium blade provides maximum performance, reduced downtime, and a consistently smooth cutting experience. Up to 3X longer cutting than standard asphalt blades. Taller laser welded segments containing superior quality diamonds along with an ultra-durable bond to the disc body for faster cuts and long cutting life. Hardened disc body absorbs vibration and increases impact resistance to deliver superior quality cuts in hardened materials such as asphalt, concrete, and green concrete. Optimized laser welded diamonds segments and diamond distribution lead to constant diamond exposure for maximum performance in high-speed cutting applications. Expertly balanced premium steel core to reduce vibration and noise. Undercut protection prevents premature wear of the steel body and less of diamond segments. **Includes a 1" arbor with a pre-set 20mm bushing.** For wet cutting. Max RPM of 5,500

SPECIFICATIONS	
Manufacturer	Diablo Tools
Application	Segmented for Asphalt, Concrete & Masonry Cutting
Diameter	14 in
Rim Design	Segmented
RPM	5,500
Pack Quantity	1
