Diamond is the hardest naturally-occurring material on the earth. Polycrystalline Diamond (PCD) tooling is manufactured in a high-temperature and high-pressure laboratory that fuses diamond particles onto a carbide substrate, which allows the diamond to be brazed onto a tool body.

T-Slot diamond-tipped router (standard T-Slot). Use with particleboard MDF, both raw or with melamine, veneer, hardwood, etc. Re-sharpen one to two times. Right hand rotation.

2+1 Cutters

Excellent for Cutting:

- Aluminum
- Aluminum Composites
- Aluminum Composite Material (ACM)
- Composites
- Hardwood
- MDF
- Melamine
- Particleboard

Benefits of Diamond Technology

- Harder cutting edge provides higher resistance to wear
- Cut thousands of feet more than carbide without changing tool, saving setup time
- Optimized machine tool efficiency
- Quality of finish is often significantly improved
