Item #HD4125, Whiteside Hercules Max Life 3/8 x 1 1/4 Solid Carbide Spiral - Downcut, 3/8 Shank \$45.55

Thank you for shopping with us!

This series is named "Hercules" for its ability to hold up under severe loads.

Meant for heavy loads, this bit is engineered for maximum bit life in high wear applications. Ideal for long production runs in MDF and laminated materials. The downcut spiral design provides the best top surface edges, ejecting chips away from the router when routing through material. This design also decreases the tendency to lift thin/small work pieces during CNC routing.

Solid Carbide is not guaranteed against breakage.

| SPECIFICATIONS | |
|-------------------------------------|---------------------------------------------------|
| Manufacturer | Whiteside Machine |
| Cut Height, Length, or Width | 1 1/4 in |
| Flute Geometry | Downcut |
| Note | Solid Carbide is not guaranteed against breakage. |
| Overall Length | 3 in |
| Shank | 3/8 in |
