Thank you for shopping with us!

Tenryu introduces a unique grind of non-ferrous cutting blades for very thin stock, such as picture frame moulding, radiator fins, or other thin-walled aluminum extruded materials.

The regular Industrial Series for Non-Ferrous blade has the anti-noise and anti-vibration design. However, this specialty thin stock non-ferrous cutting blade series performs even quieter and with less vibration. There is almost no deformation of the material after cutting and much less high pitch noise during the cut.

SPECIFICATIONS	
<b>Manufacturer</b>	Tenryu
<b>Application</b>	For chop/miter/radial arm saw
<b>Arbor</b>	5/8 in

SPECIFICATIONS	
Diameter	10 in
Grind	MTCG
Kerf	0.094
Rake	-5
RPM	5,870
Teeth	96
