TOOLS

Item #LU73R010, Freud Cabinetmaker's Crosscut Blades: LU73R \$93.69

Thank you for shopping with us!

Features TiCo™ Hi-Density Carbide Crosscutting Blend for maximum performance. Precision tensioning with computer-controlled equipment keeps the blade flat and true while maximizing blade life and performance.

Freud's new Cabinetmaker's crosscut blade includes a 38 degree Hi-ATB (Alternate Top Bevel) tooth grind that delivers excellent crosscuts in double-sided veneer plywood and double-sided melamine. With its newly added Perma-SHIELD® non-stick coating and tooth geometry, this blade is designed primarily for heavy use in a cabinetmaker's shop. The LU73 series is ideal for cutting in hardwood, softwood, plywood, and chipboard in thicknesses from 1/2" to 2 3/4" .

Tip: When cutting on a table saw, put the finish side of your workpiece facing up. When cutting with a radial arm saw or handheld saw, put the finish side down. This reduces splintering.

SPECIFICATIONS	
Manufacturer	Freud Tools
Diameter	10 in
Arbor	5/8 in
Kerf	.126 in
Plate	.087 in
Teeth	60 Hi-ATB
Type	Perma-Shield
