Item #LU74R008, Freud 8 in Dia, 5/8 in Arbor, 64 ATB Thin Kerf Ultimate Cut-Off Blade : LU74R Series

\$74.58

Thank you for shopping with us! **Application: Ultimate Cut-Off Blades for Glass-Smooth Finishes with Underpowered Saws** This thin kerf blade produces glass smooth surfaces when crosscutting hardwoods and softwoods, thanks to Freud's unique side grinding technology. The larger blades are ideal for miter box applications. Thin kerf blades remove less material than standard carbide blades, thus requiring less horsepower to produce equally good results. Premium TiCo™ HI-Density Carbide Crosscutting Blend for Maximum Performance. No Stabilizers needed. Unique Side Grind polishes the material to produce a superior finish. Perma-Shield™ Non-Stick Coating reduces blade drag, protects the blade from corrosion and pitch buildup. Ideal For: Ultimate Cut-Off Blades For Glass-Smooth Finishes with Underpowered Saws. Depth of cut (1/4" min to 1-5/8" max). **Tip:** Maintain a proper feed rate. Feeding too slow causes burning of the material. Feeding too fast can be dangerous and produces a poor dull cut.

SPECIFICATIONS

Diameter	8 in
Arbor	5/8 in
Kerf	.087 in
Hook Angle	10 deg
Plate	.063 in
Teeth	64 ATB
Type	Perma-SHIELD
Manufacturer	Freud Tools
