### Item #LU88R008, Freud Thin Kerf Fine Finish Crosscut Blades: LU88R Series **\$65.06**

Thank you for shopping with us!

#### Application: Crosscutting Blades for Fine Finish with Underpowered Saws

This Perma-SHIELD® coated blade gives new life to underpowered saws and produces smooth crosscuts in hardwoods, softwoods, and moldings. Coated blades pull 1/3 less on the saw, which translates into 33% more cutting power. Thin kerf blades remove less material than standard carbide blades, thus requiring less horsepower to produce equally good results.

Premium TiCo™ HI-Density Carbide Crosscutting Blend for Maximum Performance. Positive Hook Angle produces a smoother cut and allow for a faster feed rate. Thin Kerf reduces waste and feeds easier. Perma-Shield™ Non-Stick Coating reduces blade drag, protects the blade from corrosion and pitch buildup.

Ideal For: Crosscutting Blades For Fine Finish With Underpowered Saws. Depth of cut (1/2" min to 2-3/4" max).

**Tip:** If you experience burning on one side of the cut, you should check and adjust the saw's alignment. Consult your saw owner's manual for alignment instructions.

## SPECIFICATIONS

<b>Diameter</b>	8 in
<b>Arbor</b>	5/8 in
<b>Kerf</b>	.083 in
<b>Plate</b>	.063 in
<b>Teeth</b>	48 ATB
<b>Type</b>	Perma-SHIELD
<b>Manufacturer</b>	Freud Tools
