### Item #LU91R008, Freud Thin Kerf Sliding Compound Miter Saw Blades: LU91R **\$76.77**

Thank you for shopping with us!

#### **Application: Fine Finish Blades for Sliding Miter & Radial Arm Saws**

This thin kerf industrial blade provides a superior finish cut with sliding compound miter saws. The 5° negative hook angle helps prevent the blade from being too aggressive and pushes the work-piece down and towards the fence. Thin kerf blades remove less material than standard carbide blades, thus requiring less horsepower to produce equally good results.

Premium TiCo™ HI-Density Carbide Crosscutting Blend for Maximum Performance. Negative Hook Angle minimizes climbing for better control. Thin Kerf requires less power and allows for faster feed rate. Perma-Shield® Non-Stick Coating reduces blade drag, protects the blade from corrosion and pitch buildup.

Ideal For: Fine Finish Blades For Sliding Miter & Radial Arm Saws.  
Depth of cut (1/2" min to 2-3/4" max).

strong>Tip: For safety and best results when using a miter saw, securely clamp the material before cutting.

SPECIFICATIONS	
<b>Diameter</b>	8 1/2 in
<b>Arbor</b>	5/8 in
<b>Kerf</b>	.090 in
<b>Plate</b>	.071 in
<b>Teeth</b>	48 ATB
<b>Type</b>	Perma-SHIELD
<b>Manufacturer</b>	Freud Tools
