## Item #LU91R008, Freud 8 1/2 in Dia, 5/8 in Arbor, 48 ATB Thin Kerf Sliding Compound Miter Saw Blade: LU91R \$83.08

Thank you for shopping with us!

## Application: Fine Finish Blades for Sliding Miter & Radial **Arm Saws**

This thin kerf industrial blade provides a superior finish cut with sliding compound miter saws. The 5° negative hook angle helps prevent the blade from being too aggressive and pushes the workpiece down and towards the fence. Thin kerf blades remove less material than standard carbide blades, thus requiring less horsepower to produce equally good results.

Premium TiCo™ HI-Density Carbide Crosscutting Blend for Maximum Performance. Negative Hook Angle minimizes climbing for better control. Thin Kerf requires less power and allows for faster feed rate. Perma-Shield® Non-Stick Coating reduces blade drag, protects the blade from corrosion and pitch buildup.

Ideal For: Fine Finish Blades For Sliding Miter & Radial Arm Saws. Depth of cut (1/2" min to 2-3/4" max).

strong>Tip: For safety and best results when using a miter saw, securely clamp the material before cutting.

SPECIFICATIONS	
Diameter	8 1/2 in
Arbor	5/8 in
Kerf	.090 in
Plate	.071 in
Teeth	48 ATB
Туре	Perma-SHIELD
Manufacturer	Freud Tools
