Item #MD16-965, Amana A.G.E. Series Non-Ferrous for Thick Walled Aluminum Saw Blades: TCG Grind \$261.28

Thank you for shopping with us!

Superior-Finish cuts in aluminum & non-ferrous metals. Designed specifically for cutting relatively thick walled (greater than 1/4" thick) aluminum. The special carbide formulation and blade geometry make these blades ideal for cutting aluminum and nonferrous bars such as copper, brass, bronze, and lead. The negative hook angle, triple-chip grind, and thick steel plates combine to produce a superior finished cut. Use a coolant or blade wax and clamp down the workpiece when cutting non-ferrous metals. These blades can also be used to cut other " difficult" materials such as plastic, PVC tubing, and fiberglass. Warning: Never attempt to cut ferrous metals (steel, iron, etc) with these blades.

Good for cutting thick walled extrusions and profiles.

SPECIFICATIONS	
Manufacturer	Amana Tool
Diameter	16 in
Bore	1 in
Hook Angle	-6 deg
Kerf	0.150 in
Note	

SPECIFICATIONS	
Plate	0.126 in
RPM	4,700
Teeth	96
