Item #MD7-505, Amana A.G.E. Series Non-Ferrous for Thick Walled Aluminum Saw Blades: TCG Grind \$83.58

Thank you for shopping with us!

Superior-Finish cuts in aluminum & non-ferrous metals.

Designed specifically for cutting relatively thick walled (**greater than 1/4" thick**) aluminum. The special carbide formulation and blade geometry make these blades ideal for cutting aluminum and non-ferrous bars such as copper, brass, bronze, and lead. The negative hook angle, triple-chip grind, and thick steel plates combine to produce a superior finished cut. Use a coolant or blade wax and clamp down the workpiece when cutting non-ferrous metals. These blades can also be used to cut other "difficult" materials such as plastic, PVC tubing, and fiberglass. **Warning:** Never attempt to cut ferrous metals (steel, iron, etc) with these blades.

	NON-FERROUS ALLOYS	EXCELLENT ✓
	THICK-WALLED PHENOLIC & HARD PLASTIC	EXCELLENT ✓
	ALUMINUM	EXCELLENT ✓
	BRASS/COPPER	EXCELLENT ✓

Good for cutting thick walled extrusions and profiles.

SPECIFICATIONS

Manufacturer Amana Tool

Diameter 7 1/4 in

Bore 5/8 in

Hook Angle -5 deg

Kerf 0.110 in

Note 5/8 arbor with diamond knockout. One of Amana's most popular blades.

SPECIFICATIONS	
Plate	0.087 in
RPM	10,100
Teeth	50
