Item #MD8-485, Amana A.G.E. Series Non-Ferrous for Thick Walled Aluminum Saw Blades: TCG Grind \$88.89

Thank you for shopping with us!

Superior-Finish cuts in aluminum & non-ferrous metals.

Designed specifically for cutting relatively thick walled (**greater than 1/4" thick**) aluminum. The special carbide formulation and blade geometry make these blades ideal for cutting aluminum and non-ferrous bars such as copper, brass, bronze, and lead. The negative hook angle, triple-chip grind, and thick steel plates combine to produce a superior finished cut. Use a coolant or blade wax and clamp down the workpiece when cutting non-ferrous metals. These blades can also be used to cut other "difficult" materials such as plastic, PVC tubing, and fiberglass.

Warning: Never attempt to cut ferrous metals (steel, iron, etc) with these blades.

Good for cutting thick walled extrusions and profiles.

SPECIFICATIONS

Manufacturer	Amana Tool
Diameter	8 in

SPECIFICATIONS

Bore	5/8 in
Hook Angle	-6 deg
Kerf	0.110 in
Note	5/8 arbor with diamond knockout.
Plate	0.087 in
RPM	9,500
Teeth	48
