Item #PP1410, Popular Tools 14 in Plastic Cutting Saw \$233.00

Thank you for shopping with us! Popular Tools Plastic Cutting Saws are designed for cutting plastic or vinyl sheets, moldings, or extrusions with a maximum cutting thickness of 10mm (3/8"). For cutting thicker plastics, we recommend a TCG grind such as our [GT Series](#). These plastic cutting saws are specially designed to work well on thin sheets of acrylic material. For best results, use a stabilizer.
