Item #PT-18540-T, Tenryu Power Tool Series Saw Blades for the Contractor

$25.20

Thank you for shopping with us!

Circular saw. Table Saw. Miter Saw. Battery Powered Saw.

Primarily for Portable Saws and Table Saws.

TENRYU's comprehensive line of blades for portable and stationary power tools. More variety, better quality, and greater value. Sizes range from 4" to 12" for most types of applications. The TENRYU PT Series goes on to include thin kerf wood cutting blades designed especially for smooth cuts on miter and slide-compound.

Exceptional features and superior quality.

-Fully hardened, expertly tensioned tool-steel body absorbs impact, remains flat and true, and resists excess heat build up.
-High-grade, C-3, fine-grain tungsten carbide tips resist erosion for extended blade life.
-Aggressive rake angles for maximum cutting speed and efficiency.
-Each tip is precision honed on all four exposed surfaces. This minimizes micro-chipping along the sharp edge of the tip and results in a sharper, longer lasting edge.
-Thin kerf for less waste and lighter cutting performance (reduced feed pressure).
-Inserted tooth design on some models greatly increases the body-to-tip braze area for greater support and tip strength.
-Expansion slots and/or variable pitch gullets keep blade true under stressful work loads.
-Can be resharpened for extended blade life.

SPECIFICATIONS	
Manufacturer	Tenryu
Application	Ultra-thin kerf for finish cross/rip cutting
Arbor	5/8 in KO
Kerf	0.063
Diameter	7 1/4 in
Grind	ATB

SPECIFICATIONS	
Rake	18
Teeth	40
RPM	8,300
