Cut channels for pipes or cables using the ball end bit. The profile requires the cut to be made in a single pass. To reduce stress on the bit, cut an initial groove using a straight bit matching the D1 dimension of the ball end bit.

Max RPM 18,000

Warning: These tools have an open flute design (not anti-kickback) and are intended for high feed rate CNC machine use only. **Do not use in portable routers!**
