Item #RO1024, Everlast 10" Dia 24-Tooth 5/8" Bore 0.095" Plate 0.134" Kerf Radial Overarm Saw - Alternate Top Bevel \$102.13

Thank you for shopping with us!

Heavy, stable saw body provides excellent cutting results on all types of radial saws. The negative tooth design reduces saw "grabbing" or self-feeding, which can be an issue with overarm machine designs.

Alternate Top Bevel - ATB - Each tooth has top bevel typically between 10 and 20 degrees. Two teeth are required to provide a full kerf cut. Provides low cutting pressures, which reduce material tearing during the cutting process and provides a fine cutting finish. Best performance crosscutting.
