Item #SCFD-128, Amana 4 Facet 3/4" Dia x 3/4" Shank Solid Carbide CNC Drill (Industrial)

$344.43

Thank you for shopping with us.

Multi-faceted drill geometries translate into improved centering accuracy, thereby producing rounder, precise holes less likely for " bell-mouthing." Amana's premium-grade carbide substrate ensures increased tool life by a minimum factor of 10X's over HSS coated bits, while often eliminating the need for a prior center punch or spotting procedure.

- Aluminum Alloys
- Aluminum Alloyed Si >10%
