CUTS

Item #SD512, Freud SD500 Super Dado Sets

\$344.61

Thank you for shopping with us! **Application: Chip Free Dadoes in Veneered Plywoods & Laminates** The SD500 Series cuts everything from veneered plywoods and laminates to solid wood. Chip- and splinter-free with a super smooth, flat bottom. The SD500 Series dado sets were the first to include a 3/32" thick chipper and has the flexibility of an adjustable dado to handle today's undersized plywood. This allows the cut width to be adjusted in 1/32" increments and doubles the number of slot widths available. A shim set is also included with the dado set for fine adjustments. Use on all table saws and radial arm saws for cutting slots, grooves, dadoes, and rabbets in softwood or hardwood. Set includes 2 blades, shim set, and 6 chippers. SD508								
SD510								
SD512								

Carbide Grade Chart

Increasing Hardness: H30S, H20S, H10S, H01S, H0NS, H0NK, H0NX

Increasing Impact Strength

For safety and best results, when cutting wide and/or deep dadoes, make several light passes instead of attempting to remove the material in one pass.
