Item #SD608, Freud SD600 Series Stacked Dado Sets \$347.20

Thank you for shopping with us!

Whether you're a skilled professional or a weekend hobbyist, Freud has a dado for you. The SD608, Freud's Dial-A-Width Dado, has a patented dial system for easy and precise adjustments while offering extremely accurate cuts. **Application: Chip-Free Grooves in Veneered Plywoods & Laminates** The Dial-A-Width Dado set performs like a stacked dado, but we have replaced the shims with a patented dial system, and, our exclusive dial hub ensures accurate adjustments. Each "click" of the dial adjusts the blade by .004". The Dial-A-Width dado set is easy to use, and very precise. For the serious woodworker there is nothing better. -Adjusts in .004" increments -Maximum 29/32" cut width -Adjusts easily to right or left operating machines -Set includes 2 outside blades, 5 chippers, wrench, and carrying case -Does not need shims Cuts clean flat-bottom grooves in materials such as: laminates & melamines, solid woods, veneered plywood.

Cuts Clean Flat-Bottom Grooves in Materials such as:

Laminates & Melamines
