Item #SS100T14, Amana Tool Carbide-Tipped Adjustable Type Scoring 100mm Dia x 12x2T ATB, 12 Deg, 22mm Bore, Scoring Set

\$135.00

Thank you for shopping with us! Used on panel saws and sliding table saws with separate scoring units for chip-free cuts on both sides of the material. Adjustable scoring sets consist of two 12-tooth saw blades with shims to adjust the kerf width (2.8mm to 3.6mm). Used in combination with our industrial saw blades '6' series only. (Example: #614721, 616961, etc). Adjustable scoring sets with 22mm bore can be converted either to 3/4 in bore by ordering 2 each BU-130 bushings, or to 20mm by ordering 2 each BU-140 bushings. **Note:** Due to many different scoring machine sizes (particularly arbor sizes), it is advisable to measure both the scoring and the main blades that are presently on your machine (diameter, bore, kerf, etc).

SPECIFICATIONS
