Item #SS125T14, Amana Tool Carbide-Tipped Adjustable Type Scoring 125mm Dia x 12x2T ATB, 12 Deg, 20mm Bore, Scoring Set

Thank you for shopping with us! Used on panel saws and sliding table saws with separate scoring units for chip-free cuts on both sides of the material. Adjustable scoring sets consist of two 12-tooth saw blades with shims to adjust the kerf width (2.8mm to 3.6mm). Used in combination with our industrial saw blades '6' series only. (Example: #614721, 616961, etc). **Note:** Due to many different scoring machine sizes (particularly arbor sizes), it is advisable to measure both the scoring and the main blades that are presently on your machine (diameter, bore, kerf, etc).
