Item #SS150T24, Amana Tool Carbide-Tipped Conical Type Scoring 150mm Dia x 24T ATB, 8 Deg, 20mm Bore, Scoring Set

Thank you for shopping with us! This conical-type scoring blade is similar to the Ditec™ scoring blade, but features our standard carbide tips. Match the kerf width of your main blade by adjusting the scoring blade's cutting depth. Range typically is 1mm (for example, from 4.4mm to 5.4mm). Select a scoring blade with a range matching your main blade's kerf width. Use in combination only with our '7' series industrial saw blades (#714721, #716961, etc). Use also in combination with the new Ditec™ panel saw blades. **Note:** Due to many different scoring machine sizes (particularly arbor sizes), it is advisable to measure both the scoring and main blades that are presently on your machine (diameter, bore, kerf, etc).

SPECIFICATIONS	
Manufacturer	Amana Tool
Diameter	150 mm
