Item #TB10400, Amana Tool Carbide Tipped Thin Kerf General Purpose 10 Inch Dia x 40T ATB, 15 Deg, 5/8 Bore

\$91.58

Thank you for shopping with us!

A thin kerf blade has a slightly thinner plate and cutting tips. The benefits include reduced stress on the saw and its motor and reduced stock loss. Thin kerf blades typically are used on saws powered by universal motors, including jobsite table saws and the various types of miter saws.

Not recommended for cutting stock thicker than 3/4" unless stabilizers are used.

Warning: Before use, read saw blade safety guidelines in [Amana's catalog](#).
