Item #UDC9163, Whiteside Machine Ultra-Long Ultimate Trim Combination 1/2 in Shank Router Bit **\$258.40**

Thank you for shopping with us!

The "Ultra-Long ULTIMATE" Flush Trim Bit has a compression design to provide the best performance and quality found on our Classic Ultimate Bits on thicker stock. These bits leave a crisp, clean edge on both the top and bottom edge of the work piece, even in difficult wood grains. Having a top and bottom bearing gives you the opportunity of working with either a top or bottom template. For best performance, use the shortest cut length needed for the application. Materials: Natural woods, composite woods
